

PARIVARTAN

Nigohi

Quarterly Issue (April to June 2024)

Village: **15** | Population: **32,770**

Dear All,

Greetings from Dalmia Bharat Foundation.

We trust this note finds you well. It's with great pleasure that Dalmia Bharat Foundation (DBF) Team reflects on the incredible journey undertaken in the first Quarter of FY 25 and we are thrilled to share our collective achievements through the pages of our Quarterly CSR Magazine.

-Team DBF, Nigohi

Livelihood Initiatives

Dairy Development through shorted and Conventional AI

- Milch animals are the most common and regular livelihood activity.
- Through BIAF, promoted milch animals through artificial insemination (AI) to increase dairy production.
- 59 conventional AI and 17 shorted AI procedures were conducted.
- 76 beneficiaries were benefited by the BIAF Artificial Insemination Program.

Insemination

IRESA Based Biogas Plants

- This project promotes sustainable living, enhances quality of life, and supports environmental conservation for the beneficiaries.
- 3 households received IRESA-based biogas plants under the Gram Parivartan project.
- They are now able to save Rs. 1000 to Rs.1200 per month and gain organic compost worth Rs.1,200 to Rs.1,500 per month.

Biogas Plant

Micro Enterprise

- A garment shop by Kumkum Devi was inaugurated in the core village.
- She is expected to earn an annual income of Rs.72,000/- from this initiative.
- A cosmetic shop by Dhakia Tiwari was inaugurated in the core village.
- He is expected to earn an annual income of Rs.1,44,000/- from this initiative.

Inauguration of Garment Shop

Inauguration of Garment Shop

Zari-Zardozi

- 43 households are engaged in Zari-Zardozi work who already received training.
- Signed an MOU with the Marketing agency regarding the buyback arrangements for their raw products.

A Success Story of the New Micro Enterprise Initiative

Cosmetic Shop

Brijesh Kumar, son of Ram Sevak and a resident of Dhakia Tiwari in Nigohi, Shahjahanpur, faced the responsibility of providing for his family at the age of 36. Initially employed in sugarcane fields, his income was insufficient to meet their needs. During a household survey conducted by DBF, he expressed his desire to open a cosmetic shop in his village, where none existed. Recognizing his aspiration, DBF supported him with 10,000 under the Gram Parivartan Project to initiate the micro-enterprise and also facilitated a bank loan of 1.5 lakh.

With this support, Brijesh initiated his cosmetic shop in the village. He earns a daily income ranging from 400 to 500, significantly improving his family's financial stability. His success serves as a model for young individuals aspiring to achieve economic self-sufficiency locally, without the need to migrate to urban areas for employment opportunities.

GRAM PARIVARTAN PROJECT

(An action towards bringing change)

Introduction

The Gram Parivartan Program was launched with the aim of providing livelihoods that are economically sustainable, ecologically responsible, and socially equitable. The objective is to foster sustainable economic progress within selected communities, where household chosen for participation is expected to achieve an additional annual income of **Rs. 1,00,000**. This can be achieved through individual or group interventions and can function independently or converged with government programs.

DALMIA INSTITUTE OF KNOWLEDGE AND SKILL HARNESSING

Nurturing Futures: Empowering Youth Through Skill Development

Skill development of rural youth plays a vital role in unlocking their potential and creating avenues for a brighter future. By providing tailored training programs and workshops, we equip them with the tools to excel in various trades and professions. This not only enhances their employability but also empowers them to contribute effectively to their communities' growth and development.

SOCIAL INFRASTRUCTURE

Climate resilient Cattle Shed

- Three households received eco-friendly cattle sheds.
- Each beneficiary received a cattle shed designed to enhance the well-being and productivity of their cattle, leading to increased milk production, improved animal breeding, better general health, and reduced incidence of diseases among the animals.
- This climate-resilient cattle shed model will be replicated for 100 farmers with the support of MGNREGA; applications for these 100 farmers have been submitted to the block office in Nigohi.
